**ASSOCIATED PRESS TELEGRAM**  
New York, Sept. 9.—Owney Talas, a Russian-Finn, for two and one-half months a hall-boy in the home of Mrs. Elizabeth Nichols, the aged widow who met death last night at the hands of masked men who robbed her of gems valued at \$10,000, was arrested today after he had confessed, the police assert, to having played a part in the crime. He was formally charged with murder.

All other servants in the house were freed of suspicion, Deputy Police Commissioner Lord announced.

Preliminary examination of Mrs. Nichols' body revealed the probability that she had died of fright and not of strangulation as at first supposed, Mr. Lord said. An autopsy to be performed late today will disclose the exact cause of death.

Although the burglars stripped their victim's fingers and ears of diamonds and other jewels worth \$10,000, they failed to rattle the strong-box of her safe, in which she kept gems valued at from \$250,000 to \$500,000.

Detectives working on the case asserted soon after reaching the house that they believed the robbers probably had assistance from some one on the premises. Accordingly they sought the friends of the hall-boy, found five of them in Harlem, took them to a station house for interrogation.

The maid, the cook and the butler, in addition to Talas, also were closely questioned. The cook and the butler were both out of the house at the time, it was said.

The maid and Talas told virtually the same story: That masked men had forced their way into the house, overpowered them, tied and gagged them, and then attacked the aged widow. The chief difference in their stories was that the maid said that there were two masked men and the hall-boy said there were three.

Mrs. Nichols, in the opinion of the police, resisted the masked burglars with all the strength her 60 years permitted. Mr. Lord said today that a preliminary examination of the body showed that she had died of fright and notwithstanding the cloth drawn tightly around her neck when the body was found, she had not been strangled.

With Mrs. Nichols, lying dead on the floor of her room, the hall-boy apparently unconscious from a blow on the head from the butt of a revolver, and the maid bound and gagged in the servants' quarters, the masked robbers looted the premises. Apparently their first act was to strip the diamonds from their victim's fingers. The ear rings also were taken. The value of these gems was placed today at about \$10,000 by Mrs. Nichols' nephew, Maitland F. Briggs.

The key to the Nichols strong box carried on a string around her neck was reported missing. The strong box, in a safe in the house, contained, it was estimated, gems worth \$250,000 to \$500,000. At first it was feared, the burglars, knowing that she had these jewels in the safe, had rifled it, but examination of the safe today showed that the strong box with its contents was intact.

Talas, in what the police claim was his confession is alleged to have said that for some time several men had been endeavoring to get him to "stand in with them," to rob Mrs. Nichols, but that he had refused such advances until Tuesday night when he consented, upon the understanding that Mrs. Nichols was not to be harmed. He is further alleged to have told the police it was understood that only the jewels his employer wore on her person were to be taken. The police version of the confession quotes Talas as saying the men arrived at the Nichols home at 9 o'clock last night by appointment and in response to a double ring at the basement door, he admitted them. He told of being backed into a corner by the men and of the finding by them of the maid in the butler's room. The maid, he is alleged to have said, was threatened and tied up. One man was left to stand guard over her while the others hurried upstairs to the apartment of Mrs. Nichols. Talas is said to have asserted he was entirely ignorant of what happened in the apartment as he heard nothing. He did say, however, that the men were

**TWENTY KILLED  
WHEN AIRSHIPS  
VISIT ENGLAND**

**ASSOCIATED PRESS TELEGRAM**  
London, Sept. 9.—Twenty persons were killed and 86 others injured in last night's aeroplane raid.

These figures were given out here officially today. The German airship flew over the Eastern counties of England and London districts. The official statement gives the following list of casualties:

Killed 12: four men, two women, and six children.

Injured seriously 8 men, 4 women and two children.

Injured slightly, 38 men, 23 women and 11 children.

One soldier was killed and three were injured.

All the other victims were civilians.

The raid of Zeppelins last night is described by the Pall-Mall Gazette as "Londoners' first glimpse of the war at close quarters."

The Evening Standard speaks of the coolness shown everywhere, but warns the public against the "noticeable widespread and dangerous disposition to regard the affair as a species of spectacle."

It suggests that in addition to the Zeppelin, which within limits "is a terrible instrument of war," there is also danger from anti-aircraft guns. Therefore the public, it says, would be well advised to take aerial visitors more seriously than it did last night.

Last night's official statement concerning the airship raid stated that the Zeppelins "visited the eastern counties and the London district."

English newspapers are prohibited from publishing unofficial details concerning such attacks, but the foregoing guarded references indicated that the Zeppelins approached the heart of the city more closely than on previous occasions.

**Admits He'd Foment  
Strikes for Germany**

Dr. Konstantin T. Dumba

Dr. Konstantin T. Dumba, Austrian ambassador to the United States, has virtually admitted the charge that he would try to close munitions plants in the United States, and the next move in connection with him may be a demand by President Wilson that the Austrian government recall him.

A document to the Austrian premier was found on one Archibald, an alleged newspaperman in London. He was carrying it to Vienna. In it Dr. Dumba said that with sufficient money he could close many plants now shipping munitions to the allies. The ambassador has explained since that he merely meant he could induce native Austrians and Hungarians to quit these plants.

**PREDICT THE  
VICTORY OVER  
ARMY'S SUCCESS**

**ASSOCIATED PRESS TELEGRAM**  
Petrograd, Sept. 9.—(Via London.)—The brilliant victory won by the Russian army near Tarnopol is regarded here in the nature of a fitting celebration of the assumption of chief command of the Russian armies by Emperor Nicholas, and as an omen of success to come.

As a strictly military event great importance is attached to the victory by military circles which point out that the Germans had collected a force of Prussian guards and Austrian bridges, strengthened by both light and heavy artillery, on a twenty-mile front for the undoubted purpose of breaking through into the rich grain provinces of southwestern Russia. With inferior forces, the Russians were able to defeat the plan, despite the deliberate preparations that had been made to execute it, inflicting severe losses and "shattering" it is claimed, an entire army corps.

The fact that the Russians could not follow up the victory at Tarnopol was due entirely to the superiority of the Teutonic artillery it is declared.

There is no lack of war stores, according to war office officials and the Russian supply of shrapnel is sufficient, but the army was unable to take the offensive against the heavy guns of the Germans.

The check administered at Tarnopol is expected to have an important bearing on operations against Russian positions along the Gorin, Ikva and Stubel rivers to the northeast which operations are depending upon support from a German advance at Tarnopol. The Austro-German forces are operating aggressively against these positions, battles occurring around Dubno, Rovno and Kremenetz. The situation in the north has shown little change for the past ten days. From the statements of captured German officers it appears that the Germans do not hope to make marked progress unless Riga is captured as well as the principal junctions on the Vilna Grodno railroad.

Rains are making field operations difficult.

**ASSOCIATED PRESS TELEGRAM**  
London, Sept. 9.—For the first time in many weeks, the Russians, according to their own statements, have inflicted a severe defeat on their opponents. The battle of Tuesday near Tarnopol, 70 miles east of Lemberg, and near the Galician frontier, while not conclusive is regarded in England as indicating that the Russians are reaching the stage where they purpose striking back after their long retreat.

The Teutonic forces engaged in this battle included not only Austrian but German forces. The Russians maintain that 8000 prisoners, exclusive of the dead or wounded, measure the extent of their victory and that it would have been more pronounced but for their inferiority in artillery.

The German center is forging forward slowly by virtue of sustained pressure, but in the north Field Marshal von Hindenburg is still unable to force a passage of the Dvina.

Grand Duke Nicholas, removed as commander-in-chief of the Russian forces is today on the way to his new headquarters in the Caucasus. Pending further developments the Russian and English press is unable to fathom just what his transfer signifies. It is suggested in some quarters that the shift may be forerunner to an important Russian diversion on the Turkish frontier in connection with the Franco-British attempt to force the Dardanelles.

By means of air raids, gun fire from the sea and artillery bombardments at many places on the western front, the French and British continue to hammer German positions without launching infantry attacks.

**RESERVIST  
SENTENCED  
TO PRISON**

**ASSOCIATED PRESS TELEGRAM**  
New York, Sept. 9.—Gustav Stahl, the German reservist who swore he saw four guns on the Lusitania just before she sailed from here on her last trip, but later admitted his affidavit was false and entered a plea of guilty to perjury, was today sentenced by Federal Judge Hough to eighteen months imprisonment in the federal prison at Atlanta and to pay a fine of \$1.

Stahl received his sentence calmly and had nothing to say regarding it, his attorney declared. Judge Hough dealt with three points in imposing sentence. The first was whether Stahl made the affidavit voluntarily or by procurement of some persons whom he regarded as having authority over him. There was no evidence that such procurement had been made, the judge said. The second point was whether Stahl had committed the act "per se" and third if he had done it merely to get into the public eye and create a sensation.

With the last two points the court said he agreed. The court said Stahl was apparently a man of vanity and with a love for notoriety.

**Believed Wet Season  
Will Impose Halt On  
The Enemies of Russia**

**ASSOCIATED PRESS TELEGRAM**  
London, Sept. 9.—3:45 a. m.—Commenting upon the changes in the Russian high commands, the military expert of the Times says that short of some serious mistakes which the grand duke has hitherto shown no sign of making, the Russians can now carry on an orderly and quiet retreat, fighting where they please and for as long as it pleases them, until the wet season imposes a halt on their enemies.

The correspondent declares he fails to understand why a mass of Austrian troops was kept quiescent in Galicia during two critical months instead of being transferred to the Vilna front for the profit of the decisive operation there. He considers that in this the Germans showed poor strategy and threw away an opportunity which may never recur.

The Petrograd correspondent of the Times, thinks the appointment of General Polivanov, minister of war, as premier, will be announced soon and points that the imperial order coincides with the beginning of a solemn fast ordered by the Holy Synod which adds solemnity to an historical event.

Other papers suggest that the appointment of the grand duke as commander in chief in the Caucasus implies a new and vigorous offensive against Turkey.

The Post Petrograd correspondent declares it is no secret that many attempts have been made throughout Teutonic instigation to remove the grand duke from his command by violence, and explains that masterly as the Russian retirement had been, a retreat does not appeal to the public mind. Hence, he says, it may be supposed that the emperor's action was to unite the entire nation in carrying on the war.

**ASSOCIATED PRESS TELEGRAM**  
Washington, Sept. 9.—Unless the Austrian government itself takes some step in the case of Dr. Constantin Dumba, its ambassador here, the diplomatic incident growing out of the disclosure of the ambassador's connection with plans for hampering manufacturers of war munitions in the United States probably will be called to the attention of the Vienna foreign office.

Further developments in the case today awaited receipt of certain documentary evidence which President Wilson and Secretary Lansing are expecting from London.

In the meanwhile, officials regarded it as not improbable that unless the ambassador himself or his foreign office took some step, it might be intimated to Vienna that the good relations between the United States and Austria-Hungary would best be preserved by the presence of another ambassador. The exact procedure, however, has not been decided on.

Those closest to the president described his attitude as being very reluctant to take initial action and hoping that the situation would be relieved by the action of the ambassador himself or his government. It has been reported that the ambassador contemplated taking a vacation to attend to personal business at home. That might satisfy the needs of diplomacy, Rustum Brey, the ambassador from Turkey, took leave of absence some time ago after making public statements which violated diplomatic decorum and offended.

**ASSOCIATED PRESS TELEGRAM**  
Washington, Sept. 9.—Secretary Lansing has cancelled the passports of James P. J. Archibald, the American correspondent, upon whom British secret service men found communications from Dr. Constantin Dumba, the Austro-Hungarian ambassador, to his foreign office, on the subject of fomenting strikes in American munitions plants. Archibald is at Rotterdam and American Minister Van Dyke has been instructed to issue an emergency passport to permit his return to the United States when the department of justice probably will be called on to decide if he has violated any law of the United States in acting as a messenger for one of the European belligerents.

Cancellation of Archibald's passport is the first official action in a diplomatic situation which it has been suggested might possibly extend so far as to cause the departure of Dr. Dumba from this country.

American government officials were amazed at the disclosure which followed Archibald's detention at Falmouth and were particularly annoyed that an American passport had been used to carry what practically amounts to military information.

Dr. Dumba has made his explanation to Secretary Lansing saying the only instruction from his government was to give widest publicity to the decree announcing enforcement of the Austro-Hungarian penal code against subjects engaged in manufacture of war munitions for their country's enemies. He contended he was fully within his rights in warning his countrymen.

Yesterday President Wilson conferred with Secretary Lansing and Dr. Dumba departed for his summer embassy at Lenox, Mass., to await news of this government's decision, which, it is understood will not be reached until more documentary evidence comes from London.

Officials of the state department and the department of justice are now making some preliminary investigations which may decide what further action, if any, may be taken in Archibald's case.

Although the state department has not made a formal request for investigation of the Archibald case the department of justice is expected to turn the matter over to United States Attorney Marshall at New York, when Archibald reaches this country. Officials pointed out today that the section of the penal code under which action may be taken turns largely on the question of intent and if Archibald is able to show that he knew nothing of the contents of the papers he carried, the government may not be able to make a case.

**ASSOCIATED PRESS TELEGRAM**  
Berlin, Sept. 9.—(Via London.)—The removal of Grand Duke Nicholas from the position of commander-in-chief of the Russian armies is the text of long articles in Berlin newspapers this morning.

The Tageblatt says the grand duke was removed because, notwithstanding his undeniable gifts in the strategy of retreating, he bares the responsibility for the Russian catastrophes in Poland and Galicia, his influence being shattered in consequence.

A view more frequently expressed is that the retirement of the grand duke was dictated by political reasons and aimed particularly at the party represented by the present Russian government which had grown too strong. The Lokal Anzeiger says the displacement of the grand duke removes the government party's strongest supporter and means a loss to the army which saw in him the appointed leader. This newspaper pays a frank and generous tribute to the former commander-in-chief as a brave and honorable enemy and able leader.

The Morgen Post on the other hand terms Grand Duke Nicholas "a brutal and bloody man, without leadership talent," and the "destroyer of his army, his land and his people." It adds that the moment demands a leader of titanic strength, and asserts that "this complete cipher as a leader of Russian armies," has been discredited by his defeats.

The Vossische Zeitung finds in Emperor Nicholas' move, "final proof of the approaching breakdown of the army and state."

It asserts that the government in view of repeated defeats saw itself compelled to summon leaders of the army and the political position of the grand duke made the decision of the emperor easy.

The Boersen Zeitung views the change as having been directed against certain coteries in the inner political life of Russia, and believes it may be calculated also to impress the other members of the quadruple entente with the feeling that the emperor is doing everything possible to ward off impending evils.

The Tages Zeitung says: "One hardly errs in ascribing, along with the military significance, just as important political significance to the change. The grand ducal party whose head was the former commander-in-chief, has suffered a very real defeat."

President of Switzerland Claims Neutrals are War's Victims—Interview in Paris Paper.

(ASSOCIATED PRESS TELEGRAM)

Paris, Sept. 9.—Neutral nations are justified in protesting against war because they are its victims in the opinion of Dr. Giuseppe Motta, president of Switzerland, who expressed his views in a conversation with Etienne Lamy, the French academician. An account of this interview which appears in the Petit Parisien quotes President Motta as having said:

"The will of neutrals is less respected in time of war," he said. "It is not then, sufficient that they await the end of the conflict. For then passiveness has ceased to be a duty and energy has become the proper policy. They have a right to raise their voice against war, because they are its victims. It is legitimate for them to unite their influence because they are injured in common, but the hour has not come for that effort. Words, like spent bullets, would glance off the armor of bel-

ligerents without penetrating it, but armor finally becomes heavy even for the strongest arms."

### PREPARING FOR RETURN OF STUDENTS

Granville Bustling With Activity in Anticipation of Big Enrollment For Fall Term at Denison.

(Special to the Advocate)

Granville, Sept. 9.—The weather man seems to be in a mood for giving the returning students a warm welcome next week. The advance guard is already on the ground. "Frat" houses are being aired and dusted; new residents are settling into their new quarters, or still seeking desirable places in which to settle; several changes of location among old residents have been effected and the town begins to feel the annual impulse that the opening of the fall term imparts to the old town. One has to live here year after year in order to recognize just the particular sensation of expectancy of waking after a quiet nap, and getting into the current of events which sweeps everybody along for nine months in the year.

The Columbus association held in the Welsh Hills church Wednesday and Thursday has been a great success. Yesterday's meetings were well attended, in fact the house was packed and many were obliged to stand. A fine spirit was manifest from the start, and all the numbers on the program were enjoyable and profitable. Not the least feature of the day was the luncheon served at noon by the ladies of the Welsh Hills church, which for excellence and abundance could not be surpassed. This material evidence of hospitality and good will was most heartily appreciated by the visitors. The officers were: Moderator, J. R. Davies, Newark; Clerk, Rev. L. M. Darnell, Columbus; Musical Director, W. P. Ullman, Granville; treasurer, F. M. Jones, Alexandria.

Mrs. Theodore Johnson has returned from a brief visit with Miss Eleanor Hills of Delaware, O. While in Delaware, Mrs. Johnson was invited to sing in the Presbyterian church last Sunday and on the testimony of mutual friends she scored a great artistic success. At an informal song recital given by Miss Hills in her honor, she was at her best and received the warmest commendations of the music lovers present.

Mr. James A. Gantfort is again on the ground getting everything in readiness for the reception of new men for Denison next week. This work of the Y M. C. A. in greeting new students as they arrive and importing needful information in just the right way, has become an invaluable department of its service in this place.

### School Children

### Can't Afford Handicaps

In a remarkable test, recently made under the supervision of the State Board of Health of Minnesota, over 9000 school children were questioned as to what they ate for breakfast.

A large percentage of the breakfasts consisted of coffee, bread and butter; coffee and oatmeal or some other cereal; coffee and hotcakes; coffee and biscuits; coffee and coffee cake, or coffee alone. Probably the same conditions prevail everywhere throughout the country.

"IS IT ANY WONDER," SAYS THE EXAMINING PHYSICIAN, "THAT 23 PER CENT OF THESE CHILDREN HAVE FREQUENT HEADACHES?"

He was thinking of the chief cause—coffee. And it IS no wonder when we consider that coffee contains the powerful drug, caffeine, a nerve poison and notorious cause of headaches, heart trouble, sleeplessness, irritation, and other ills!

Parents often wonder why their children are sickly, dull and backward in school, when frequently the cause lies in the homely, accepted habit of giving them a beverage containing an insidious poison.

When scientists and Boards of Health everywhere are speaking out against the dietetic dangers to which children have been so long subjected, it is high time that parents take heed and correct these conditions. No child should be permitted to use coffee. It is easy to furnish them instead the pleasant, pure food-drink—

# Instant Postum

Made from wheat, roasted with a bit of wholesome molasses, Postum contains the goodness of the grain and is a most delicious beverage, economical, convenient and free from coffee drugs or any other harmful substance.

Postum comes in two forms: The original Postum Cereal, which has to be boiled; Instant Postum—soluble—made in the cup with hot water—instantly. They are equally delicious, and the cost per cup is about the same for both kinds.

## PETITION FILED FOR BOND ISSUE FOR LIGHT PLANT

A petition asking for a vote at the municipal election in November, for the proposition to issue bonds for \$30,000 to rehabilitate the municipal electric light plant, was filed today with City Auditor A. Nelson Dodd. The petition is signed by 917 Newark voters who are anxious to see the matter voted upon again. The filing of this petition is an echo of the bitter fight waged early this year on the same proposition. The only difference is that council submitted the question by ordinance which called for a special election, while this fall it is initiated under the new I. & R. law. At the special election when the proposition was voted upon it failed to carry by a small margin.

## PLEASANT CHAPEL

One of the pleasant occurrences which break the monotony of country life, and link the country people together more closely in social and church life, is the social Sunday school picnic, which are becoming more numerous every year.

Such a picnic was held at Pleasant Chapel Saturday, September 4. Although the weather was inclement, yet a goodly number from the different denominations gathered at the church, with well-filled baskets as the ladies of this place know so well how to prepare. The superintendent, not to be outwitted by the ladies, saw to it that there was plenty of ice cream and chicken for everybody. At the noon hour an appetizing dinner was served which was greatly enjoyed by all present.

After the tables were cleared a short time was spent socially, then an interesting program was given, consisting of recitations, readings and songs, after which all dispersed to their homes, feeling that they had been benefited spiritually, socially and physically.

Those present from a distance were Mr. J. K. Pounds and wife, Miss Pearl L. K. of Newark, Mr. Floyd Dodson, of Nashport, Miss Rosa Roe, of Highwater and Miss Maud Kreager, of Carmel.

"Colonel Carter of Cartersville." Burr McIntosh is the hero—or more correctly speaking—the central figure of the World Film Corporation's motion picture drama, "Colonel Carter of Cartersville," based on F. Hopkinson Smith's well-known novel of that name.

The colonel is a lovable character in the book; on the screen Burr McIntosh suggests the character in so graphic a manner that anyone who has read the book would recognize him.

There are some stirring war scenes in the early part of the picture; the atmosphere is distinctly Southern; the characters well drawn; consistent and well acted.

Photographically, and as a production, "Colonel Carter of Cartersville," is a very pleasing picture, which should delight all lovers of high class comedy dramas.

"Colonel Carter of Cartersville" will be shown at the Auditorium theatre matinee and night, Friday and Saturday, Sept. 10 and 11.

## BURNS FATAL; HEATING TAR FOR A ROOF

(Associated Press Telegram)  
Canton, O., Sept. 9.—Miss Ada Christen, 48, died late Wednesday of burns received from hot coal tar which splashed over her body. She was engaged in heating a bucket of tar on her kitchen stove, assisting her father in mending a roof. The tar suddenly flamed up. She endeavored to remove the bucket from the stove and an explosion followed which enveloped her in flames. Death came an hour after the accident.

## AUTOMOBILE BURNS SECOND TIME; GAS IGNITED BY ENGINE

The Grant automobile owned by R. B. Haines, was destroyed by fire at the Patterson repair shop at Union street and the Pennsylvania railroad crossing Thursday morning at 8.30 o'clock when gasoline which overflowed from the tank was ignited from the exhaust pipe from the engine.

Mr. Haines had stopped to have the tank tilted and after this was accomplished, he started the engine. There was a flash as gasoline ignited. A fire extinguisher was used without effect and a call was sent for the fire department.

Before the arrival of the two trucks from headquarters the gasoline tank exploded drenching the machine in blazing gasoline. The body was badly damaged, only the frame work being left.

The same machine was damaged in a similar fire several months ago but was rebuilt and has been in use all summer. The loss will amount to several hundred dollars.

## WILL ATTEMPT TO LOWER THE TRACK RECORD

(Associated Press Telegram)  
Hartford, Conn., Sept. 9.—The novelty on today's card in the grand circuit meeting at Charter Oak track will be the attempt of Directum I, the world's champion racer to lower the track record of two minutes flat made by Star Pointer in 1899. Tommy Murphy will hold the reins over the pacer. The track is in good shape for the trial.

Other events carded are the 2-14 trot with seventeen eligibles and the 2-21 trot with twenty-five paid-up entrants, each race for a \$2,000 purse. Some close heats in these races were looked for.

## Decisive Game for City Championship to Be Played Sunday

The deciding game for the city championship will be played Sunday afternoon at Wehrle Park. Game called promptly at 3 p. m. This will be the last game of the season. These two clubs (Heisey and C. A. C.) played a double header last Monday in which each club took one game, the C. A. C. winning the first by the score of 8 to 3 losing the second 5 to 2. The crowd that witnessed these games was well pleased as the games were well played and exciting, especially the first game which was close and also a tie up to the seventh inning, when the Heisey blew up and the C. A. C. aggregation took the advantage and scored five runs, enough to win. Sunday's game should be the most exciting game of the series.

## OHIO CORN BOYS TO ENJOY TRIP TO WASHINGTON

(Special to The Advocate)  
Columbus, O., Sept. 9.—While it is hardly possible that the annual trip of champion Ohio corn growers, pie, cake and bread bakers, to Washington and Philadelphia this year will be as largely attended as in former years, there is every indication that a goodly number will enjoy the trip. The start will be made from four different points in the state, and special trains will be used to make the trip. Ample funds have been provided for all prize winners, but the change in the agriculture commission somewhat delayed the work, and many boys who intended to enter got confused, and failed to qualify. There will probably be more girls than boys, under present plans, the excursion will be open to everybody, and at least two trains will be needed to care for all.

**Willis-Cole-Dick.**  
The Willis-Cole-Dick triumvirate is not setting the woods on fire. Gov. Willis has found it impossible to arouse any enthusiasm for his presidential aspirations and under this arrangement to date not a single county has given its endorsement. Not a single one of the three seems to be helped any by association with the other. The Willis presidential candidacy is generally looked upon as cowardice—as an acknowledgment of his fear to meet the results of his inefficiency as governor. It is now evident that even should Willis decide to drop his presidential aspirations he will have trouble in again being nominated for governor. Others have been building gubernatorial fences and some of them are not reticent about the fact that they will oppose Willis if he runs, again, though they are perfectly willing to let him butt his head against the presidential wall, as the Republican goat.

**The Hesperian's Gun.**  
(Philadelphia Record.)  
In standing pat upon the proposition that no American lives may be imperiled nor American property destroyed by attacks without warning upon unarmed and unresisting merchant steamers the United States occupies ground unassailable in morals or in international law. Beyond that proposition it is dubious how far we may rightfully go.

Germany's contention, from the outset of her policy of submarine warfare on merchant shipping, has been that the introduction of new elements into naval war has made obsolete the rules of international law framed to fit outworn conditions; that a submarine cannot halt a merchant ship, search it and provide for the safety of those on board without being subjected to attack and destruction meanwhile. We have denied this contention, at the same time pointing out that even if it were true it did not justify a resort to barbarism, but rather pointed to the necessity of attention from such employment of technical armaments. Our denial has been strengthened by the success of submarines in many instances in halting merchant ships and ordering their passengers and crews to places of comparative safety before sinking them. And, finally, Germany has admitted the correctness of our position by ordering a suspension of the policy which brought her to the brink of war with the United States.

What explanation the German Government may make of the attack on the Hesperian, which jeopardized the lives of Americans, though none was lost, is still conjectural. If, as reported by United States Consul Frost, the Hesperian was armed with a small gun, a technical service is raised which may be of service to Germany in justifying the act. Such armament does not make a merchant ship into a naval vessel, but it certainly suffices to endanger a submarine attempting a legitimate hold-up, and makes the point at least debatable whether the Hesperian should have been held immune from summary action on the part of the attacking submarine.

**Moral—Keep a Pencil Handy.**  
Thoughts come to us as strangers for the first time, or as friends who have been present before. If we do not entertain the stranger or the friend they will not remain. Neither will the thoughts if we do not entertain them. The man without many friends is poor, but the man without many thoughts is doubly poor.—Christian Herald.

**Two Kinds of News.**  
Some woman has murdered her husband out East and now we are to have first page copy of the miserable stuff for two weeks, and outlandish pictures of the murderess and her spouse and all the children, all headlined with black type. On the same day appeared an account of a rich young girl rescuing a dissolute young man from the gutter and sending him to college, on the promise that hereafter he would be a man. This noble deed took 20 lines and a nonpareil head and that is the last you will hear of the noble act, so full of the beauty of humanity, but the murder will drag on through the columns for weeks, or some little while of why she did or did she do it at all? Why so much journalistic pretension given to the murder? Is it because human interest turns rather to crime than to virtue? And are you not that way, too, gentle reader?—Ohio State Journal.

**Saw No Danger of Militarism.**  
Last week we were in a little Green Mountain village. On the porch of the general store we met a tiny old man, very old and very hard of hearing, and in the course of our conversation, asked him if he had fought in the war. "I'm a mite hard of hearing," said he with pride in his voice. "Taint my age, neither. No, sir. It comes from laying on my stummock at Gettysburg—right where Pickett's charge came—with the big guns not a dozen rods behind a firn' over my head. Them explosions didn't do my ears much good."

He chuckled. "What do you think of the danger of militarism here if we begin to train our boys to defend the country?" we asked. "Danger!" he snorted, and threw out his chest. "See that boy yonder? Grandson of mine. When this here war broke out I sent and got him the best rifle to be bought, with cartridges, and I've been a-teachin' him how to shoot. If we need men, there's one that's about ready to do his share. That's what I think of militarism in this country of ours. Haint no more danger of it than there is of pumpkins off'n a strawberry vine."—The American Boy.

**Test of Candidates.**  
It is not enough to examine a candidate for the party tag that he wears. It is not enough to know that he is somebody's friend. Columbus, in the new government, does not need Democrats or Republicans as such. It wants men with a vision, a willingness and a strength of service, no matter to what party they belong.—Columbus Dispatch.

**Injury to Many.**  
Because Germany is not permitted to import cotton less explosives are made having this material as a basis; consequently, more explosives are made which are based on benzol, picric acid and other coal tar products; consequently these materials, which are also used in producing the intermediates employed in the manufacture of dyestuffs, have become so scarce that very small quantities only can be exported to Switzerland; consequently, the Swiss manufacturers of dyes are producing only enough for home consumption and have none to spare for export to Great Britain; consequently, the British government has put an inhibition on the export of Swiss chocolate to Germany, which has been its principal market. This is only a part of the endless chain of consequences flowing from a lawless warfare on commerce. And at the beginning of the fragment of the chain is the injury to American cotton growers, while at its end is the injury to Swiss chocolate makers—and there are injuries to neutrals at every intermediate link.—Philadelphia Record.

When we know anything good about a man we forget to mention it to others. But when we know anything bad about him we get a megaphone and let the world know it.

A man will stand in front of a bar for three hours and enjoy it. But if he has to stand in a street car for ten minutes on his way home he gets highly indignant.

The girls have just as many freckles as ever, but you can't see them through the enamel and powder.

The man who grips your fingers until they hurt is a pest, but he has it all over the man who takes hold of your hand with a paw that feels like a dead fish.

There are about 978,654,237 ways to get into trouble. But talking too much is the easiest way.

What has become of the old-fashioned girl who used to help mother to wash the dishes?

Every day you say, "Oh, it will be no trouble at all," when you know that it is going to be a whole lot of trouble.

The reason why a woman marries a man who looks like something the cat brought in is because she is afraid some other woman will marry him.

A woman can sneeze and not make herself offensive, but when a man sneezes people begin to hunt for raincoats and umbrellas.

It is human nature to wait until a man hasn't any teeth before you offer him a bone.

Have you ever noticed that the man who is known as a walking dictionary is usually too poor to ride?

Where two or three women are gathered together some other woman is getting a good panning.

**THE OSTRICH.**

"The ostrich hides, in sand or shale, its head, when men pursue it." There's just one trouble with this tale—the ostrich doesn't do it. The ostrich has a pair of limbs that shame our modern motors, and o'er the desert sand it skims a, when chased by loomed voters. It scoots along with easy tread, as fast as racing cycle; "I do not need to hide my head," it says, "so help me, Michael." Some liar of an older day, some falsifier able, sent forth that roorback on its way, that stale, bewhiskered fable. The ostrich is a bird of sense, with wit and prudence gifted, and from the mists of fable, dense, its fame should soon be lifted. It shows how close a bad renown will stick when once you gain it; you can't excuse or live it down, or sidestep or explain it. A story's told of you in youth—some scandal friend may fake it—and be it lie or be it truth, you'll find it hard to shake it. So let us cease to pass around the tales that have no backing; some good man's fame we thus may wound, some heart we may be cracking.

The ninth in the series of development articles written for the Advocate by Anna Louise Shafer takes up the mental side of physical culture, giving us the expressive value of movement as well as its muscular development value. This would seem to add an intensely interesting element to the series.

By Anna Louise Shafer.

Do not ever let the mental side of physical development escape you. It is not only the most beautiful side of this science, but the most beautiful.

Some great mind has given us the axiom that "the first function of the imagination is the apprehension of ultimate truth." Let your imagination as well as your muscles work in these exercises. Form a mental picture of the ideal you wish to grow toward, and the lines of your face and figure will gradually mold themselves accordingly. This will be the ultimate truth, and the ultimate result of your effort.

[National Hairdresser]  
To curl the hair to stay curled, nothing equals plain liquid shimmer. It is little be applied to the hair with a clean tooth brush before retiring. The loveliest wavy effect imaginable will be in evidence in the morning and this will last a long time, regardless of temperature or weather.  
This simple method is not to be compared with curling by means of a hot iron because, instead of injuring the hair, it is really beneficial. A few ounces of the liquid, which may be procured at any drug store, will last for months. One can curl the hair in any style desired and the effect will be one of perfect naturalness. The best way is to divide the hair into strands and moisten each of them from root to tip without the least grossness or stickiness.

What is to prevent it? The differences are not organic, but the result of differences in environment. Mind and will are greater than either. Lesson IX.

In lesson number I, on oppositions we gave three general divisions of the body—head (mental), torso (moral), limbs (vital or volitional). In expression the hand is also mental. Our lesson today will be an explanation of an expressive pose. Vital strength and energy in the limbs; weight on the right foot, poised well forward, a race to be run, and the start well made. An arresting thought, and the hand seeks the brow, shading the eyes for a questioning backward look. A good exercise for the development of body balance and general expression.

### Certain Manufacturers

BEING fully informed on the condition of the basic factors which underlie and affect all trade were able during 1914 to contract for their raw materials practically at the bottom price of the year, and at what will probably be the bottom price for two or three years. The experience of these men is conclusive evidence of the importance of keeping constantly posted on underlying conditions.

At regular reading of our monthly Report on Trade will enable any man, no matter how well informed, to keep better informed.

#### Iron Trade Review

(Associated Press Telegram)  
Cleveland, Sept. 9.—The Iron Trade Review today says: Great activity in steel plants of the country, due largely to war orders, is shown in the large increase in production of pig iron for August. The largest output since May, 1913. Two-thirds of the increase was from furnaces connected with steel plants. The iron sales during the past week have continued at a very fair rate, although no unusually large tonnage have been involved. The iron ore market is quiet. It is probable that the entire shipment from the Lake Superior region for the season will be 45,000,000 tons.

New York, Sept. 9.—Further sensational advances in war specialties overshadowed all other operations today's early market. Bethlehem Steel opened three points up at 302, rising gradually to 305 to which it immediately added another five points, exceeding its previous high record by six points. The preferred opened at 150, a gain of 2 1/2. Crucible Steel showed an overnight gain of 1 1/2 at 89, soon advancing to 90 1/2. Other issues in this group rose one to three points. U. S. Steel made initial gain, the fraction later rising to 76, a full point. Among railways, Reading, Canadian Pacific and Erie First Preferred rose a point each while Morris and Essex, a Lackawanna subsidiary declined from 17 1/2, its last previous quotation, to 17.

### PROVES ALIBI AFTER ARREST FOR A MURDER

(Associated Press Telegram)  
Providence, R. I., Sept. 9.—The alibi offered by Henry Edwards, the youth arrested at Worcester yesterday in connection with the investigation of the murder of Justice Willis S. Knowles, has been accepted as complete and convincing. It was announced by the police today. Edwards established that he was in Providence at the time Justice Knowles was shot from ambush near his home in North Scituate. John J. Simonds, a local barber, and LeRoy C. Bush, both declared that Edwards was in Simonds' shop in Providence at the hour of the murder. The police are now working on the theory that some person who had been before the justice in court was implicated in the crime. The body of Judge Knowles was taken to Hockington, Athens county, O., his former home, Tuesday for burial.

### WOULD CLEAR UP MYSTERY OF LOST VESSEL

(Associated Press Telegram)  
New Orleans, Sept. 9.—The United Fruit company, advertised today that it would pay the ransom demanded by anonymous letter writer for Captain McLaren, two members of the crew and two passengers of the lost liner Marowijne, who the writer says are held prisoners on an island in the Gulf of Mexico. The advertisement was signed by C. H. Ellis, vice president of the company. It explained it was called forth by the receipt of a second anonymous letter from the person who wrote the company August 23, that five men from the Marowijne were held for ransom and that the ship's papers and the captain's watch had been sent to the company's New York office as proof. The writer was invited to communicate with Mr. Ellis. "We have received none of the proofs you refer to at our New York office," the advertisement read. "If you have any proofs present them; we are willing to pay ransom demanded."

### SUBMARINE CAME TO SURFACE AND VIEWED LINER

(Associated Press Telegram)  
New York, Sept. 9.—Some of the 300 passengers arriving here today aboard the American liner New York from Liverpool, said they had been informed by officers of the ship that on the outward voyage, when near the coast of Ireland, a German submarine had come to the surface, surveyed the vessel and then leisurely submerged. The undersea craft arose off the starboard bow of the New York and remained on the surface only a short time. The New York was not halted, it was said.

### "GET READY" WALTERS DIED TODAY FROM BRIGHT'S DISEASE

(Associated Press Telegram)  
Columbus, Sept. 9.—Willard D. "Get Ready" Walters, aged 73, who for the past thirty years has been a familiar character on Columbus streets and in public places warning passersby to prepare for the second coming of Christ, died today from an attack of Bright's disease. He had been confined to his home only a few days. Mr. Walters was a Seventh Day Adventist and firmly believed that the end of the world was close at hand. His own convictions were so strong that he purchased a megaphone and for years carried it with him wherever he would go, urging all to "get ready" for the end of the world. Thousands of Columbus people knew him by sight. Up until about three years ago, "Get Ready" as Mr. Walters was familiarly known was on Columbus streets almost every day. His old cry of "Get Ready! Get Ready! The world's coming to an end," has been heard by many thousands. Mr. Walters was born June 14, 1842, in Milton, Pa., and was educated in Pennsylvania public schools. For nearly a year and a half during the civil war Mr. Walters served as a member of the Fourteenth Regiment, Pennsylvania Volunteers. In the European war Mr. Walters believed he saw the great world strife predicted in Revelations, and confidently held that the second coming of the Lord is not far away. For several years preceding the declaration of war among the European nations, he had been prophesying a war among nations through his megaphone.

**ITCHING ECZEMA COVERED ENTIRE BODY, RESINOL CURED**

Could Not Sleep. 8 Remedies had Failed. Resinol Stopped Itching Immediately.

Boston, Mass., Aug. 11, 1914.—"My entire body, even my eyelids, was completely covered with blisters as large as a pea. When one would burst water would come from it, and then it would turn into a very painful sore. The burning and itching were something terrible, and I COULD NOT SLEEP nor rest. I think I had one of the worst cases of eczema a human being ever had. "I used eight different kinds of remedies without success. I then tried Resinol Ointment and Resinol Soap and it stopped the itching IMMEDIATELY. I gradually noticed a change for the better. Now I am entirely cured, and am without a pimple or blemish on any part of my body." (Signed) Edward F. **WOULD REFER ARABIC MATTER TO THE HAGUE**

Washington, Sept. 9.—Germany's note explaining the sinking of the White Star liner Arabic, with the loss of American lives, was awaited today by administration officials who declined to comment on versions of its text contained in Berlin press dispatches. The note, delivered by the Berlin foreign office to Ambassador Gerard on Tuesday, was understood to ascribe the liner's destruction by a submarine to self-defense, express regret over the loss of American lives and to propose to refer to The Hague questions of reparation and compensation.

Assurances previously had been expressed by Ambassador von Bernstorff that full satisfaction would be given in connection with the Arabic's destruction. While some officials thought the submarine commander's explanation appeared unconvincing it was understood that judgment would not be passed until the official text had been received.

**BEAUTIES "STUNG" BY PROMOTERS**

Girls in Beauty Contest Must Pay All Expenses Except Railroad Fare—Only Two Go.

Columbus, O., Sept. 9.—When the "American Art Film company's" beauty special left the union station Tuesday night for the two expositions and goodness knows how many other Western points, there were but two regularly chosen beauties aboard.

The four other beauty contest winners—there were six chosen by the movie patrons—stayed at home.

And there's a reason—even beauties must eat.

The story is one of promises, postponements and dashed hopes. The long and short of it is that the American Art Film company "flivvered." It promised a "free" trip to the six winners of the beauty contest chosen by votes of movie patrons and wound up by offering them their railroad fare. The Exposition Tourist Co. came across with the addition of free Pullman fare, but that left the "free trip" winners to pay their own hotel, restaurant bills, etc., etc.

Mrs. Albert A. Rush, 388 East Gay street, and Miss Graye Donovan, of Delaware, were the prize winners who went.

"After all the publicity I just had to go or be laughed out of town," said Miss Donovan.

Mrs. Rush concluded that half a loaf was better than none and just couldn't give up the trip.

"It certainly was a great disappointment to me the way things turned out," said Miss Alma Biederman, 144 East Schiller street, who led in the beauty contest, but refused to go under the circumstances.

Miss Kathleen Dodd, Circleville; Miss Irene Mayer, Toledo, and Miss Billy Clark, Massillon, were the other contest winners who stayed at home.

C. L. Dowerman of the Royal Photo company, who, with W. L. Mackey took over the promotion of the beauty contest after the first blow-up of the American Art Film company, says that the four who didn't go on the beauty special will be given railroad tickets, which the company will redeem for \$91.50 each.

It all came about in this manner. The original American Art Film company agreed to give the six beauties a trip to the exposition, paying all expenses. The company put up \$500 in cash and a check for an equal amount as security that the trip would be made. A short time later this company went bankrupt, according to W. L. Mackey of the Exposition Tourists' company, 114 North Front street. He says that he and Dowerman then decided to put the "Beauty tour" through.

Mackey says he figured they could do it with the \$1000 the defunct film company had up as security. Recently he discovered that the \$500 check of the company was worthless. Monday he notified the contest winners that the American Art Film company was insolvent, but that the Exposition Tourist company had \$500 of the former company's money. Mackey said his company would use this money and purchase railroad tickets for the six members of the "beauty party," and they would go on the trip Tuesday if they could furnish the money for their meals and hotel accommodations.

Dowerman of the Royal Photo company, who took the pictures of the beauties and who is also a member of the Exposition Tourists' company, left Tuesday night in charge of the party, which included a number of paid tourists as well as the two beauty contest winners.

Dowerman said that a number of things originally planned for the entertainment of the "Ohio beauty party" would be carried out. They include visits with governors of several western states and entertainments by a number of civic organizations.

Newark people were interested in the contest for there were several Newark working amahos emfwpyp Newark girls working as contestants and the pictures of the girls were shown at a local motion picture theatre, who purchased the films from the company promoting the trip.

**NO EXAMINATIONS TILL COURTS DECIDE CONSTITUTIONALITY.**

(Special to The Advocate)  
Columbus, O., Sept. 9.—No examinations will be conducted by the state civil service commission for the more than 1500 places which are made vacant by the new law, until the question of the constitutionality of the Moore-Barnes bill is settled by the courts. This announcement was made by Dr. Campbell, chairman of the commission. Just as soon as the court decision is rendered however, examinations will be called and conducted in several cities of the state at the same time, thus creating an eligible list from which hundreds of appointments will be made. Applications and inquiries by the hundreds are being received daily by the state commission.

**MARVIN CUSTER IS STRICKEN AT BUCKEYE LAKE**

Marvin S. Custer, 59, died suddenly of heart disease on Wednesday afternoon in a sand pit near his home at Buckeye Lake. Mr. Custer was well known to many Newark people through their acquaintance with him at Buckeye Lake where he has spent the past several years at his home, Custer Point.

Mr. Custer, was formerly a Pennsylvania Railroad engineer, and before going to the lake resided in Columbus, where he is survived by his widow and one daughter, Mrs. Harry De Val.

The deceased supplied lake restaurants with ice and groceries. He was employed as a Pennsylvania engineer for 27 years and helped to build the Baltimore and Ohio Southwestern and the Toledo and Ohio Central. He was the son of former Sheriff Custer of Franklin county and a nephew of General George Custer, the famous Indian fighter. He had named his launch at the lake the General G. A. C.

**DEMOCRAT GETS AN APPOINTMENT BY STATE BOARD**

(ASSOCIATED PRESS TELEGRAM)  
Columbus, O., Sept. 9.—W. H. Weyrich, Democrat, of Dayton, whose position as engineer of construction of the state department of public works terminated last week because of the failure of the legislature to make an appropriation to continue it, has been engaged by the state board of agriculture, to supervise the construction of the new state fish hatcheries in Summit county. The erection of this improvement was started under the direction of Engineer Weyrich when he was connected with the public works department. Most all of the flood prevention work of the department was supervised by Weyrich.

**QUESTION PUZZLES CITY TREASURERS**

(Special to The Advocate)  
Columbus, Sept. 9.—What are the treasurers of the different cities of the state going to do with the money that is received as fees for examinations which will be conducted by municipal civil-service commissions? This is puzzling some of these city officials, and the court will be asked to decide the question. The Moore-Barnes bill provides that the money received by the state civil service commission shall be paid into the state treasury, and deposited to the credit of the general revenue fund. But in case of municipal examinations all the law says is that the money shall be paid into the city treasury. In several cases throughout the state, city treasurers have refused to accept money paid to the municipal civil service commissions because the law does not state what fund it shall be credited to.

### Your Boys and Girls

The proper care of babies and children is as much of a study and a life work as any business that a man has ever undertaken. And yet, today, the majority of girls are wholly unprepared for the duties of motherhood. The richer classes depend upon their trained nurses more or less, but the thousands of mothers of the middle class are left to experiment for themselves, usually at the cost of their health or of their domestic happiness, and at the risk of their little ones' lives.

Few young women have been told much about the care of babies and no one knows but a mother how utterly helpless and overwhelmed she feels when the little live bundle is placed in her care for the first time. She realizes that its health, both of body and soul, depends upon her, and not only that, but perhaps the whole happiness of the family is hinged on her care of that baby.

### RELATIVES OBJECT TO PATIENTS' TRANSFER TO LIMA HOSPITAL.

(Special to the Advocate.)

Columbus, O., Sept. 9.—Over three hundred patients or wards of the state which have been classed as "criminally-insane" have been transferred to the new hospital at Lima, and arrangements are being made by the state board of administration to send at least 100 more there within a fortnight. Serious objection has been made to the board by the relatives of some of these patients who were taken from different state hospitals, and committed to the Lima institution. They are not objecting to the treatment of the new hospital, but they do object to having their unfortunate relatives classed as criminally-insane. Nothing can be done in the matter until the management of the Lima institution is transferred to the board of administration on Oct. 1. Then it is said by Dr. A. E. Stepien, president, that the complaints will all be investigated, and all probability some of those now confined here will be sent back to the institution from whence they came.

### In Milady's Boudoir

By Given Sears

Mothers should realize that each generation lives differently, and ideas of ethics are changing, and if she would go hand in hand with her children, she must be a student with them. Some people seem never to grow old, always seeming to be young and buoyant, carrying their years lightly. Their secret is that they keep the mind young and fresh by activity, the heart light and merry, and live above the little worries of life.

So remember that growing old rests much with oneself. If one wishes to grow prematurely old, discard youthful employments and pursuits, and settle down to elderly ways; just as some individuals become invalids, when by a little effort they might shake off their physical lethargy and raise themselves up to health and vigor.

For a woman to change her daily routine of life to that of the younger set, she necessarily will have to conserve her strength and do a certain amount of training at the beginning. She must also take an inventory of her beauty possessions, and where there is any deficiency she must make improvement. It may be possible that her circulation is not perfect, and that the veins of the hands are very pronounced. This condition may be remedied by indulging in arm exercises.

Such an exercise should be taken standing; the arms are raised outstretched at the sides and continued high up overhead, and at the same time the body is lifted to the tiptoes; standing so the arms are then bent at the elbows, hands lowered, and the feet rest flat on the floor. This exercise may be repeated fifteen times; each time the hands are lowered at the back and an effort is made to reach further down. This action brings about a better circulation and gives color and symmetry to the arms and hands.

## WAR BUREAU HAS THE BEST SECRET CODE

The United States government employs probably more different kinds of codes than any other power. The state department has one of its own. The navy uses a separate and distinct system. The code book or key of the navy cipher is kept always in a canvas bag, which is lined with zinc and heavily weighted. The bag is in the personal custody of the commanding officer of the ship, who has orders never to let it get away from him, but to throw it overboard in the event of capture by an enemy. The advent of wireless telegraphy has made this precaution doubly necessary, for the solution of an enemy's cipher in time of war might easily turn the scales of victory.

The only naval code book ever captured by an enemy was the one carried by the Chesapeake in the war of 1812. The commander of the Chesapeake, Captain Lawrence, was wounded early in the battle, and no one else knew where the code book was kept. When the frigate surrendered the British found the code behind a sliding panel, and the book is now in the British museum.

The cipher of the war department is very simple in its nature and by virtue of this simplicity, ease of operation, inaccuracy and rapidity with which a new key can be substituted is said to hold first place among the military ciphers of the world. Army officers who have used other codes say that none of them compares to this one.

This cipher may in a general way be described as an ingenious method of distorting the order of words in a message and further obscuring the meaning by the systematic introduction of irrelevant words and meaningless names. The variety of distortions is great, and whenever a copy of the cipher is captured another cipher can be communicated in a very short time to all those who should have it.

A simple and ingenious naval cipher was invented by Captain Charles Morris for the use of the American navy during the war of 1812 and has been utilized by the navy department, with modifications, ever since. The principle is applicable alike to flag ciphers or numerical ciphers transmitted by telegraph or wireless.

Captain Morris in a hand written signal book bound by him in 1811 stated:

A circumstance may sometimes render it desirable to change the significance of the flags or the numbers expressed by them. The following method should therefore be adopted:

Let each day of the week be inserted in the signal book opposite a number. To each of these days affix a certain number, which is always to be communicated orally under charge of secrecy, that no enemy or improper person can become acquainted with it. The following list is an example:

Sunday	.....(add).....	1
Monday	.....	2
Tuesday	.....	3
Wednesday	.....	4
Thursday	.....	5
Friday	.....	6
Saturday	.....	7

Before commencing your communication insert the number corresponding to the day you wish to use. This will signify to the person who is to read the signal that he is to add the number corresponding to that day to all signals that may be made. The person sending the signal will subtract the same number from all signals. By this means an enemy's knowledge of your ordinary signals might really be converted to his disadvantage. Instead of the benefit which he might promise himself from them.

While nobody could tell you today the code used by any power in transmitting important and vital news and instructions, some of the more ordinary ciphers have been discovered. For instance, one of the simplest of all official ciphers is that used by the British foreign office for the transmission of comparatively unimportant messages, the cipher being too well known to risk detection when there is much at stake.

The letters of the alphabet are arranged in the form of a square:

1	2	3	4	5
a	b	c	d	e
f	g	h	i	j
k	l	m	n	o
p	q	r	s	t
u	v	w	x	y

Each letter is then represented by two numerals. Thus A would be 11, D would be 41, R would be 34, and so on. The letter Z, which has to be omitted from the cipher because of the fact that there are twenty-six letters in the alphabet, is represented by 0, while the same symbol is used to separate words.

Thus in "Rush arms to Zanzibar" the cipher would be:

34254320112432405530114304221124.

This cipher has the advantage of almost infinite variety, as by changing the arrangement of the numerals one may easily baffle a chance recipient of the message, while the person for whom the cipher is intended would have no trouble in reading it.—James Hay, Jr., in Every Week.

## Leaves Orphanage Between Days; Girl Apprehended Here

Stella Dailey, 15 years old, who escaped a week ago from St. Vincent's Orphanage at Detroit, was taken into custody here this morning by Juvenile Officer John Dwyer and will be held to await the arrival here of Detroit officers who requested her detention. She is being held at the children's home in East Newark. Miss Dailey's father is employed in Detroit and her mother lives here. When she disappeared from the orphanage the officials made a good guess that she probably would come to Newark. The source of her financial aid, necessary for the trip, may be an interesting feature in the case before it is closed. An officer is expected here Friday or Saturday.

## CARRANZA

Will Probably Refuse to Enter the Joint Conference of Mexican Factions.

[ASSOCIATED PRESS TELEGRAM]  
Washington, Sept. 9.—Secretary Lansing announced today that General Carranza's reply to the Pan-American peace appeal was expected tomorrow or Saturday. The secretary said he had no advice as to its nature. Unofficial reports, however, indicate Carranza will decline to enter into a joint conference of the Mexican factions. As soon as Carranza's answer has been received a meeting of the Pan-American conferees will be called.

Advices to the state department from Torreón under date of Sept. 7, say Durango was taken by Carranza forces, and that Villa followers retreated in the direction of Torreón.

(The Beauty Seeker.)  
"The real secret of keeping young-looking and beautiful," says a well-known hygienist, "is to keep the liver and bowels normally active. Without these requisites, poisonous waste products remain in the system, polluting the blood and lodging in various organs, tissues, joints. One becomes flabby, obese, nervous, mentally sluggish, red-eyed, wrinkled and sallow of face."

## BRITISH VESSEL IS TORPEDOED IN TURKISH WATERS

(ASSOCIATED PRESS TELEGRAM)  
Berlin, Sept. 9.—(By wireless to Tuckertown, N. J.) — A statement given out by the Overseas News Agency today quotes the Wessertzeitung of Bremen as saying that the British steamship Southland, serving as a transport, was torpedoed recently in Turkish waters. The News Agency says: "The Wessertzeitung of Bremen points out that the transport Southland was torpedoed in Turkish waters. The Southland formerly was the Red Star liner, Vaderland. These steamers flew the Belgian flag up to the time of the occupation of Belgium, and then sailed under the American flag. Now the Southland, which lately was flying the American flag, suddenly was changed into a British transport."

No previous report has been made concerning the torpedoing of the Southland. A wireless dispatch from Berlin last week quoted a telegram from Sofia to the effect that a British transport had been sunk by a mine off the entrance to the Dardanelles, with the loss of 1870 men. It was thought at the time that the Berlin report might have been an inaccurate version of the sinking of the British transport Royal Edward in the Aegean sea on August 14, by a German submarine.

The British government has made no announcement of the sinking of another transport, following the loss of the Royal Edward. Shipping records show, however, that the Red Star liner, Vaderland, was re-named the Southland, being placed under the British flag, and was commanded by the British government for war purposes last March. She is listed as being employed in the hospital service.

### PERRYTON

The Perryton Girls' class of '98 held their sixth annual picnic at Rock Dale park recently. At 12:30 o'clock the company of twenty-eight persons, surrounded the table and enjoyed together a grand picnic dinner. The after-dinner program was held in the summer house of the park. After singing a hymn together and engaging in prayer, Mrs. A. J. Hoyt, toastmistress of the class, read a letter from Miss Ursula Tyler, a member of the class of '98, who is now on the ocean sailing for China, where she goes as a missionary teacher. Mrs. Cullison and Mrs. Brown then sang a duet, "I Shall not be moved," after which various toasts were given by all the members of the class. The next half hour was given to children who acted out a story and played several games on the lawn. The class then reorganized, electing Mrs. Florence Vanatta of Granville, president, and Mrs. Minnie Shippe of Columbus, secretary and treasurer for 1916. The last hours were spent in various out of door games planned by Miss Madge Frampton and too soon they said "good bye," hoping to meet at Rock Dale again in 1916. The class desires to extend its thanks to Mr. Prout for the use of his park and picnic furniture generously provided for them, also to the Cardinal families for their help and kindness.
